PHOTO CONTACTS PRO ™

Windows Mobile Smartphone Edition

POCKETX Software

Release Notes (Version History)

Version Number: 6.01

(Changes from Version 6.00)

Release Date: 5-25-2010

New Features

- Keyboard support for Samsung Code (sch-i220)

Enhancements

- Other minor enhancements

Version Number: 6.0 - Major Release

(Changes from Version 5.08)

Release Date: 2-10-2010

New Features

- **Windows Phone / Windows Mobile 6.5 compatibility**
- **Faster graphics and improved user experience with smooth scrolling**
  Photo Contacts PRO 6 is smoother and more fun to use! Graphics will smoothly scroll while you page through contact pictures in one of the 3 views, view details, browse contact categories and search for contacts.
- **Distinctive Email Tones with VIP Email notifications**
  Assign distinctive sounds to contacts for new email notifications. A custom sound will notify you when you get an email from a specific person. A custom vibration will alert you when you get an email from an important person (eg. your Boss, your Wife, the President).
- **Customizations for latest devices - Samsung Jack, HTC Ozone, HTC Snap, Verizon HTC Ozone, Sprint Snap**

Enhancements

- Pressing the Back button now clears the category filter if one is active
- Pressing the middle-joystick button in Detail view now shows the Call Dialog to enable quick calling in this view
- Keyboard customizations for Samsung Jack, HTC Ozone/Verizon HTC Ozone, HTC Snap/Sprint Snap
- Default theme is back to Windows Blue!
- New splash screen
- Many other minor enhancements

* Two short sounds and one High Quality ringtone are bundled with Photo Contacts PRO - they are stored in the \Windows\!px_ringtones folder on the phone for easy assignment as a contact ringtone or sms/email sound.

* One extra loud ringtone and one extra loud SMS tone are also bundled and stored in the \Windows folder (px_*.mp3). They are used for the Extra Loud profile.

Version Number: 5.08
(Changes from Version 5.05)

Release Date: 3-3-2009

New Features

- **T-Mobile Shadow II support**
- **WM6.1 Sliding panel integration with Photo Contacts PRO's Advanced profiles**
    - Easily select and switch Regular, Call Filtering, Temporary and Automatic profiles when using the Sliding Panel Home Screen theme
    - Currently active profile, type and remaining time (in case of Temporary profile) are shown in the Sliding panel
- Easily assign commonly used Categories to contacts with a few button presses and enable contact grouping
- Added new **Extra Loud profile** bundled with a custom super-loud ringtone and SMS tone to be used in noisy environments

Enhancements

- Increased image size limit when assigning/adjusting photos - large digital camera photos can now be used when assigning pictures (limited by phone's memory)
- Themes can be switched in the main Options menu
- Fix for SMS send parameters
- Theme enhancements for Business Blue and Business Black
- Switched to higher photo save resolution for assigning photos for clearer pictures, added 400x400 option
- Asus M530W keyboard support
- Samsung i200 installation support
- Other minor enhancements

* Two short sounds and one High Quality ringtone are bundled with Photo Contacts PRO - they are stored in the \Windows\!px_ringtones folder on the phone for easy assignment as a contact ringtone or sms/email sound.

* As of version 5.08, one extra loud ringtone and one extra loud SMS tone are also bundled and stored in the \Windows folder (px_*.mp3). They are used for the Extra Loud profile.

Version Number: 5.05
(Changes from Version 5.04)

Release Date: 5-21-2008

New Features

- **New themes/skins** that personalize the look and feel of the contact manager. The user can select from more than 25 skins.
    - New Business skins (Black, Blue, Pink, Silver)
    - New Artistic skins
    - New All Black/high contrast skins
- New **Theme Picker** letting you visually pick the skin/theme Photo Contacts PRO uses (run at first start or from Options)
- **Two new Photo Caller ID modes**:
    - **Large Text** Caller ID uses very large text for the name, company and number of the caller for extra easy readability
    - **Large Photo** Caller ID shows a picture fully covering the screen during an incoming call.
- Colors can now be fully customized in the program in all views, for dialing, SMS sending and Caller ID

- Compatibility with latest devices
- **Samsung Blackjack 2** keyboard support (i617)
- Samsung i325 keyboard support
- Added .mp4a ringtone/sms tone support

Enhancements

- **Faster Caller ID performance**
- Photo Contacts PRO will now automatically restart itself in 60 seconds if it is closed due to low memory on the phone
- Enhanced call filtering performance on BlackJack 2 and T-Mobile Shadow
- Louder SMS tone volume on some devices (including Moto Q9)
- SMS and Email tones will now vibrate on Moto Q9h/Global, BlackJack2
- Added middle name support; Middle name shown in Detail View; middle initial shown in other views
- Automatic profiles enhancements
- Reject Unknown profile added
- Louder Ringtone preview volume (now set to follow RingVolume)
- Verizon Q9m Home screen customization
- Motorola Q9C and Q9m keyboard customizations
- Number formatting applied in Home Screen plugin
- SMS/Email tones restored if program is quit
- Allows * character to be used for redialing from Home Screen
- When on phone, short beep is used to notify user of an incoming SMS or Email
- Call/SMS dialog enhancements
- Motorola Q9h, Q9C, Q9m sound customizations
- Updated Visual Users Guide
- Many other minor enhancements

* Two short sounds and one High Quality ringtone are now bundled with Photo Contacts PRO - they are stored in the \Windows\!px_ringtones folder on the phone for easy assignment as a contact ringtone or sms/email sound.

Version Number: 5.04

(Changes from Version 5.03)

Release Date: 12-1-2007

New Features

- **T-Mobile Shadow** - added full support for jog dial (scroll wheel), keyboard and full screen Photo Caller ID
- **T-Mobile Shadow Home screen speed up** - get faster phone performance by using the Photo Contacts PRO plugin on the Home Screen - featuring advanced profiles and pictures of recent callers and favorite contacts
- **Distinctive Email Tones** - added ability to assign distinctive sounds for incoming Email messages
- Samsung sgh-i321n keyboard support
- **Filtering of SMS, Email per contact** - sound normally played for incoming SMS and Email will be silent if the message is received from a contact that is blocked by Reject, Hangup or Silent filter.
- Major **Full Screen and Business Photo Caller ID** performance increase

Enhancements

- The program now automatically imports your Outlook contact pictures at first start (but does not replace existing Photo Contacts pictures)
- Photo Contacts PRO will select its own profile to mimic profile selection changes made using regular profile menus on the phone.
- Enhancements to automatic profile switching and recurring appointments
- Added "Hangup Unknown" to list of preloaded profiles

- Ability to view contact notes in detail view in Photo Contacts PRO
- Enhancements to distinctive SMS capabilities on some phones
- Blocks 777 and 86 from showing up in the Recent Calls list on some devices
- Added support for umlauts
- Distinctive SMS sound will stop playing if the hardware Reject button is pressed
- Enhancements to Options screens - added descriptions of options
- Included a second short sound that can be used for incoming SMS or Email

* Two short sounds and one High Quality ringtone are now bundled with Photo Contacts PRO - they are stored in the \Windows\!px_ringtones folder on the phone for easy assignment as a contact ringtone or sms/email sound.

Version Number: 5.03

(Changes from Version 5.02)

Release Date: 10-24-2007

New Features

- Added Smartphone 2003 support and support for devices with 176x220 screens
- Added Automatic Profile switching based on the subject of a meeting
- Added support for SMS message sent confirmation and saving of Sent SMS messages
- When a call filter is applied to a contact the BlockList_PC category is assigned to the contact, automatically grouping all blocked contacts
- Added support for Full Screen Photo Caller ID on Samsung Blackjack (sgh-i600)
- Added support for DRM protected MP3 sound files for ringtones
- Added support for automatically switching Bluetooth ON/OFF using a profile on Motorola Q (Widcomm bluetooth stack)

Enhancements

- Speed improvements - everything is now faster
- Enhancements to the Home Screen plugin
- SMS message sending enhancements for Motorola Q, Motorola Q9
- Profile list is colored based on the current Home Screen theme
- Enhancements for caller ID buttons on Motorola Q
- Added pre-defined SMS Answer profile
- Added option to clear recent calls on the Home Screen
- Back button can be used to dismiss the incoming SMS message window
- Contacts with only a company name, or only first/last name defined are sorted inline with regular contacts

---

Version Number: 5.02

(Changes from Version 5.01)

Release Date: 10-03-2007

* An updated Visual Users' Guide (PDF) is packaged with the installation.

* One high quality ringtone and one SMS ring are included in the "\Windows\!px_ringtones\" folder.

New Features

- Optimizations for T-Mobile Dash, Samsung Blackjack, Motorola Q9M and Motorola Q
- New Call Filter Profile manager allows you to easily configure sound and call filtering settings per profile

- T-Mobile Dash for WM6 - helps with the native phone problem where the reminder sound type does not get restored (eg. When switching from Vibrate to Normal reminders still vibrate instead of sound)
- Added new WindowsMobile6 and Silver themes (skins)

Enhancements

- Enhancements to Home Screen plugin
- Enhancements to Automatic Profile Manager
- Updated Home Screen layout for portrait and landscape phones
- Option to bypass profiles

Version Number: 5.00 / 5.01 - Major Release

(Changes from Version 4.06)

Release Date: 9-20-2007

* An updated Visual Users' Guide (PDF) is packaged with the installation.

New Features

- **Home Screen Plugin** - displays Favorite Contacts with pictures, Recent Caller pictures, shows Active Profile information right on your Home Screen
- Fully integrated Scheduled, Automatic and Temporary Timed Profiles
- **Profile Scheduler** - take full control of the phone and incoming calls by creating a schedule that automatically switches phone profiles based on hours, days, calendar.
- **Automatic Profiles** detect meetings and appointments and automatically switch profiles when appropriate.
- **Timed Temporary Profiles** enable you to quickly switch to a certain profile temporarily (for 2 hours when in a cinema for example), automatically switching back after the time passes. They also feature a Ringtone/SMS tone override enabling you to utilize an extra loud ring when active.
- **Multiple Meeting Triggers in Automatic Profiles** - Up to 8 Meeting triggers are supported allowing you to configure the phone to automatically switch profiles based on categories defined in meetings in your calendar
- **Complete Privacy** - New call filter **HangUp** feature allows you to automatically Hang Up undesirable callers or unknown or private numbers (without sending them to voicemail)
- **SMS Answering Machine** integrated with profiles - automatically Reject and send an SMS message to callers notifying them you're busy
- **Distinctive SMS Tones with Manager** - know exactly who the sender is when you get an SMS message - distinctive SMS sounds can be applied to individual contacts, groups or unknown senders
- **SMS Picture ID** - shows a picture of the SMS sender when an SMS message is received
- Profiles can change ringtones and SMS tones with sound overrides
- Profiles control Bluetooth, incoming ring volume as well as SMS message and system volume
- **Enhanced Speed Dial** window allows you to quickly send or respond with custom or pre-defined SMS messages
- **Photo Manager** enables you to assign pictures to contacts, contact groups (categories) and unknown/private callers for Photo Caller ID and SMS Picture ID purposes
- **Full Screen and Business Photo Caller ID feature 3 new buttons**:
  - Silence (silence an incoming call without sending it to voicemail)
  - Speakerphone Answer (answer the call and automatically enable the speakerphone)
  - Reject with SMS (send the call to voicemail and send a quick SMS text message to the caller)
- **Bluetooth can be enabled / disabled via a profile, temporary profile or an automatic profile** saving you precious battery power
- Added .mp3d and .mp3-drm as valid ringtone extensions allowing DRM protected ringtones to be assigned to contacts

Enhancements

- Many other enhancements and UI improvements including a glowing border effect
- Customize incoming caller id number formatting for international users
- New sample pictures and an alphabet map allowing large letters to be easily assigned as contact pictures included in the package

- One high quality ringtone and one SMS tone included in "\Windows\!px_ringtones" folder.
