Installing Hit Hard

Hit Hard   is distributed in a zip file. This file must be unzipped in order to
install Hit Hard   . To install Hit Hard   from an IBM type PC, the following applies:
Hit Hard can be installed like any other Palm application with the Palm Install
Tool:
- Launch the Palm Install Tool.
- Select "Add".
- Find the file Hit Hard.prc where you unpacked/unzipped
- Do a HotSyn…

Must read

- The Hit Hard   Setup utility and Hit Hard   only work on IBM type PCs, not on
  Mac type PCs.
- After installing Hit Hard   from a IBM type PC on you handheld, you invoke Hit
  Hard   on your handheld by tapping on the Hit Hard
  icon on the applications launcher.
- If you have previously installed the Shareware version, and wish now to
  install the registered version, DO NOT delete the Hit Hard   application from
  the handheld (unless, of course, you were just experimenting and want to
  start over again) – this would delete the program AND your data as well.
  Simply install the registered version of Hit Hard.prc, and it will continue to
  work with the database you created with the shareware version. The Hit Hard
  database has been designed so that future releases of Hit Hard will be able to
  work with an existing database from a previous release.

- The registered version of Hit Hard   is a different program file than the shareware version. If you have installed the registered version, do not install a more recent shareware version; it will not be registered, and you will lose the additional functions of the registered version. However if you so desire to try out the Demo version of the update, you should take backup of your existing data and then install the .prc. In this case you will not lose the existing data and once you decide to install the updated registered version you can retrieve the saved data. If you are entitled to a free update, it will be emailed to you.

If you believe you have discovered a bug, please report it to the author by email at mailto:palmhouseinfo@rediffmail.com. As mentioned above, the registered version of Hit Hard   is a different program file than the shareware version. If you have installed the registered version, do not install a more recent shareware version; it will not be registered, and you will lose the additional functions of the registered version. If you are entitled to a free update, it will be emailed to you.
