## About SlovoEd

**SlovoEd** is a well-known set of products developed by [Epocware/Paragon Software Group](#) for such popular mobile operating systems as Palm OS, Pocket PC/ Windows Mobile, Windows CE Smartphone and Symbian OS. High data compression ratio for dictionaries and high retrieval rate are available thanks to the special technology developed by Paragon Software (SHDD). Our software is absolutely user friendly due to the handy user interface and the wide range of tools which are provided by the dictionary engine: you can look up words and view wordlists as well as use your own dictionary databases created with the help of a special instrument.

This manual describes the version of **SlovoEd** which is compatible with the following Series 80 mobile devices: Nokia 9300 and Nokia 9500.

## Useful programs

Pay your attention to other useful programs developed by **Epocware/Paragon Software Group** for communicators based on Symbian OS:

	<b>Nokia Essentials</b> is a set of 4 popular programs for Nokia 9300, Nokia 9500 communicators: Handy Safe Pro, Zip Manager Pro, Power Data, eBook Reader.
	<b>Handy Safe Pro</b> is a perfect assistant for secure and convenient managing all of your important information in one place. Data password protecting and encrypting will keep your information in safety. Due to the synchronization with PC you can easily enter and edit the information.
	<b>Power Data</b> is an easy-to-use and high performance database management system (DBMS) for Nokia 9300, Nokia 9500 that enables you to capture, store and retrieve information about similar items.
	<b>Zip Manager Pro</b> is a powerful and easy-to-use file compression Nokia 9300, Nokia 9500 software. Zip manager provides the way for you to handle zip files in a more conventional way. It can be useful for those who gets the e-mails with attached archives or downloads the archives to Nokia 9300, Nokia 9500 communicators from the Internet. It also allows to extract or create new archives.
	<b>eBook Reader</b> is a viewer and organizer for electronic books for Nokia 9300, Nokia 9500 communicators. With eBook Reader Nokia 9300, Nokia 9500 Software you can download and read eBooks from Web-based eBook stores. eBook Reader allows you to make

bookmarks, continue reading from the page where you stopped and create library.
---

Visit <http://www.epocware.com> if you want to try the trial-versions and get the full versions of the described programs.

## Main features of the SlovoEd program

These are the main features which have always distinguished "**SlovoEd**" program, providing you maximum convenience and highest possible result:

- large number of dictionary entries
- phonetic transcription in a dictionary entry (for some dictionaries)
- special word learning method. You can save certain words to Flash Cards and then take a Flash Cards Quiz to test yourself
- Word of the Day. Learn new words without scanning the dictionary! Every day a word is chosen from the dictionary at random and is shown to you (once a day or on every start of the program).
- sound available. You can listen to the pronunciation of a word – provided that an appropriate Sound Module is installed
- using "**SlovoEd**" program you can install several dictionary databases on one mobile device. Their dictionary databases are merged (i. e. the word search is carried out among all words from all these dictionaries)
- easy switching between dictionaries
- search history. Your last 15 queries are saved in the history – you can come back to the entries you have seen at any time.
- low memory consumption
- ability to search the words which spelling you do not know exactly
- ability to order the dictionaries directly from your device
- ability to install **SlovoEd** on an expansion card
- you can now use your own dictionary created by using a compiler "**SlovoEd Studio & Conversion Tools**" installed on your desktop computer

## Language versions of "SlovoEd"

We can offer you the numerous explanatory and bilingual dictionaries for the following languages:

Bulgarian	Greek	Russian
Croatian	Hungarian	Serbian
Czech	Italian	Slovenian
Danish	Latin	Spanish
Dutch	Lithuanian	Swedish
English	Norwegian	Turkish
Estonian	Polish	Ukrainian
French	Portuguese	
German	Romanian	

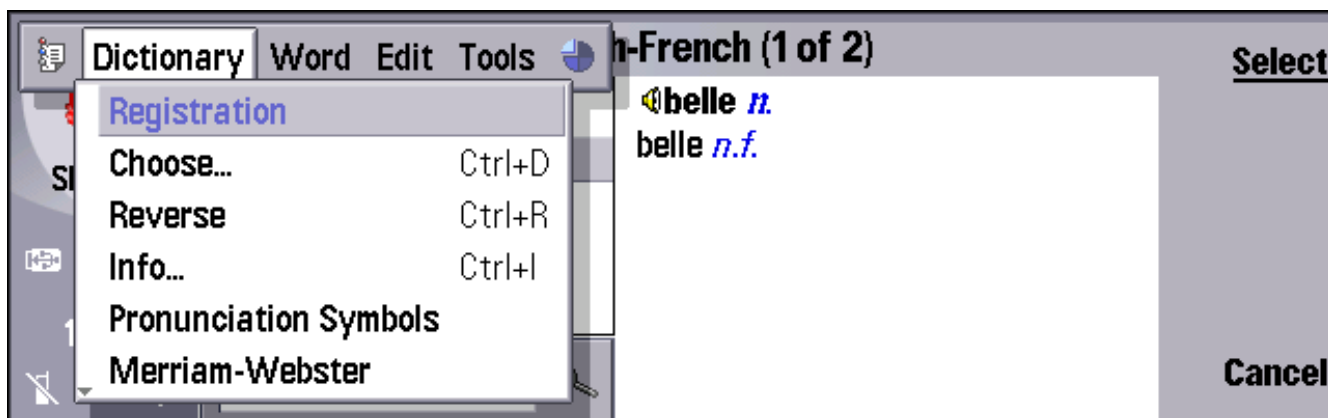

Dictionary interface is available in the following languages: English, Russian, French, Italian, Spanish, German, Greek and Dutch.

Some language versions of the dictionaries are available in several editions: **Compact, Classic, De luxe**. You can choose any edition according to your needs and device memory limitations.

Please, visit our web-site to find out more about the dictionaries available for your language:  
<http://www.epocware.com/>.

## Trial-version limitations and registration

The more you use an unregistered dictionary, the more often you get a message saying your copy is unregistered instead of the translation. To register the dictionary, open the menu **Dictionary > Registration**

If you have already purchased the product press **Register** and enter the registration code for desired dictionary or Sound Module which was sent you after purchasing.

### NOTE

*Please be accurate when you type in the registration code: do not mix up zero with letter O, you should not enter any unnecessary spaces in the input line.*

If you use the trial-version of the dictionary and decide to buy it you can make your order immediately from your communicator. For this purpose press Buy button in the **main** or **Registration** window.

### NOTE

*To convert the trial-version to commercial one you need to register it using Registration code or e-mail you used used for ordering dictionary or sound module*

## Installation of "SlovoEd"

### ATTENTION!

*Do not forget to make a backup copy of your mobile device data before the installation of any program (including "SlovoEd") to avoid the accidental loss of important data.*

To start using the dictionary you should install the following components:

1. SlovoEd dictionary engine
2. One and more dictionary databases, which you want to use.

**NOTE:**

*Using the SlovoEd program you can install and use several dictionaries databases at once and easy switch between the dictionaries*

You can install the Database using \*.sis files (from the desktop computer or directly from the device).

Installation from the \*.sis file requires that in the main memory of your device there is 3 times as much free space as the volume of the file (no matter what is the source media).

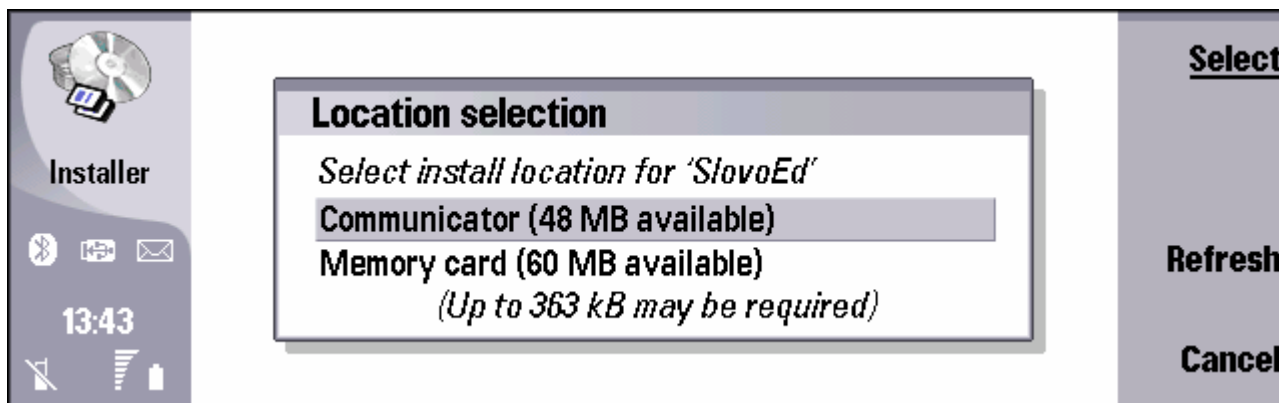

## Installation from the desktop computer

**ATTENTION!**

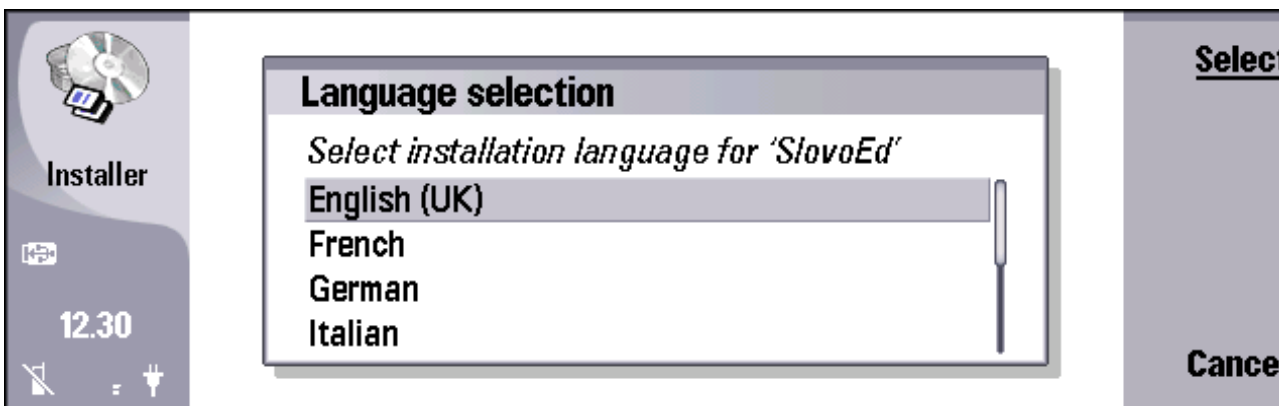

*Be sure that the program for smartphone connection with PC is installed on your PC. You can find the necessary program on the disk which is supplied with smartphone.*

To install the dictionary do the following:

1. Establish the connection between your communicator and the desktop computer, using Bluetooth, Infrared port or a cable.
2. Run the installation \*.sis file and follow the instructions of the installation program.
3. A dialog where you can select the destination media will appear. Select **Communicator** if you want the dictionary to be installed into the main memory, or **Storage card** if you want the application to be installed on an expansion card.

4. Choose the interface language

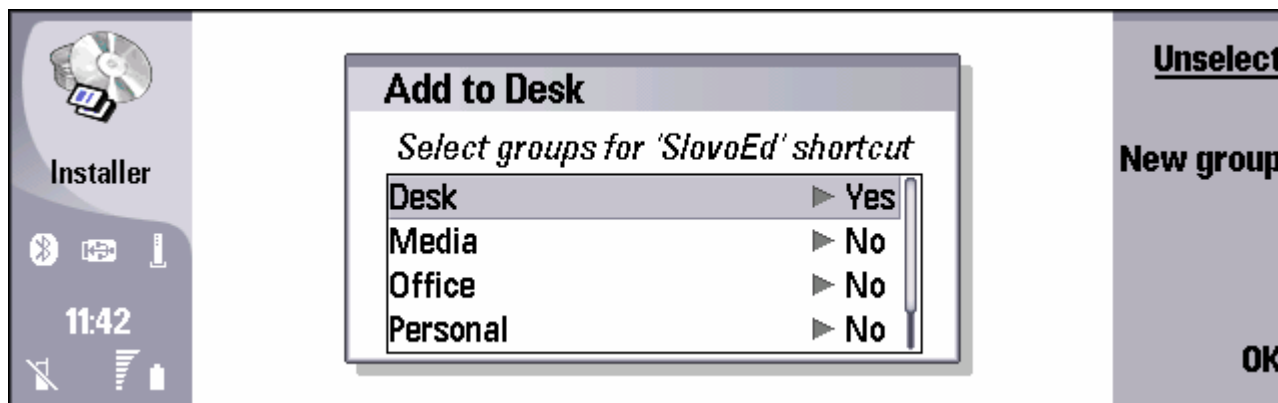

**NOTE:**

If one of the following languages (English, Russian, French, Italian, Spanish, Dutch, German or Greek) is chosen as a **Preferred language** in your communicator preferences (**Tolls>Control panel>Data manegment>Application manager** tab **Preferences**) this language will be choosen for SlovoEd interface during the program installation.

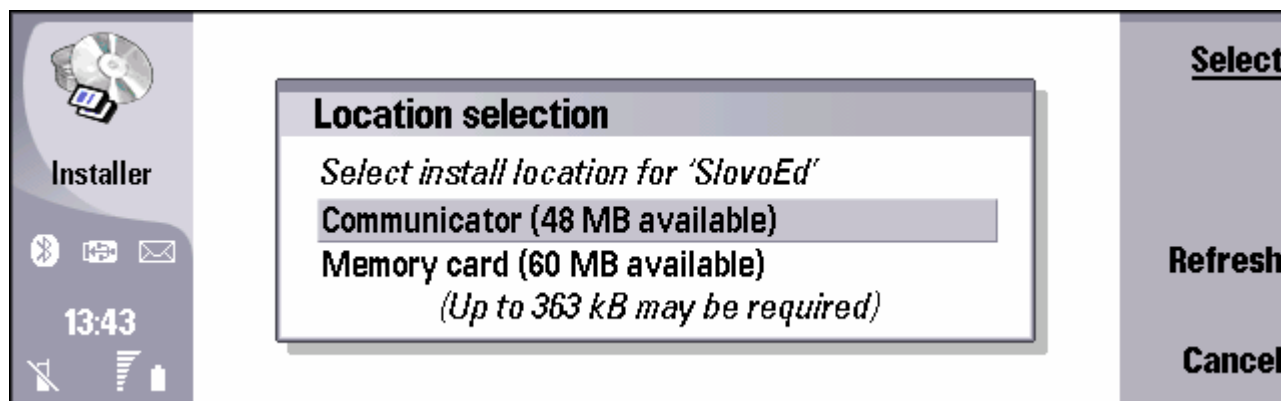

In this case you will not see the window with the list of available languages.

- Choose the folder where the **SlovoEd** icon should be.

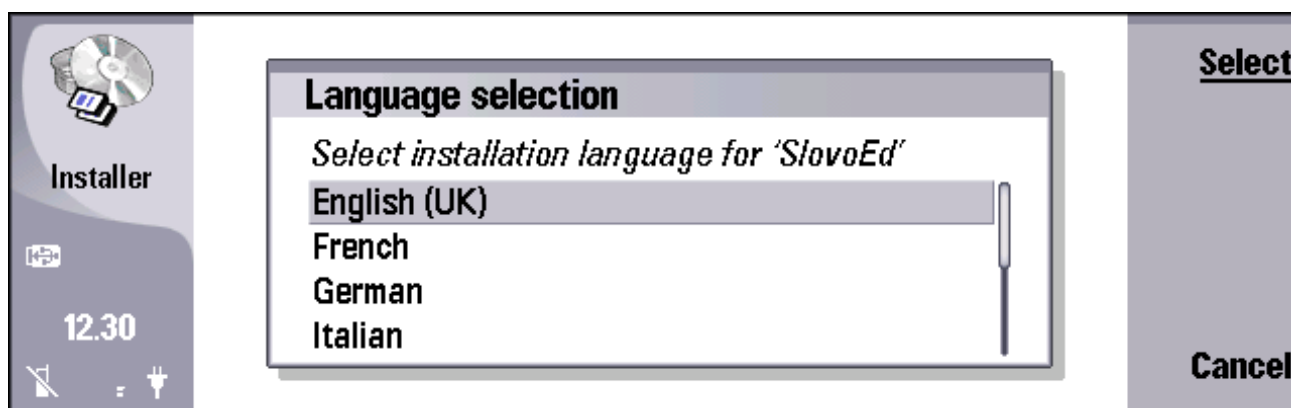

## Installation from the device

- Copy the installation (\*.sis) files to your device (using Bluetooth, Infrared or by some other method). Depending on a model of the device, you may need to run a special application to make the copying of the files possible.
- Open the **Messages**.
- Select the installation files in the list and press **Open** to run the installation.
- A dialog where you can select the destination media will appear. Select **Communicator** if you want the dictionary to be installed into the main memory, or **Storage card** if you want the application to be installed on an expansion card.

- Choose the interface language

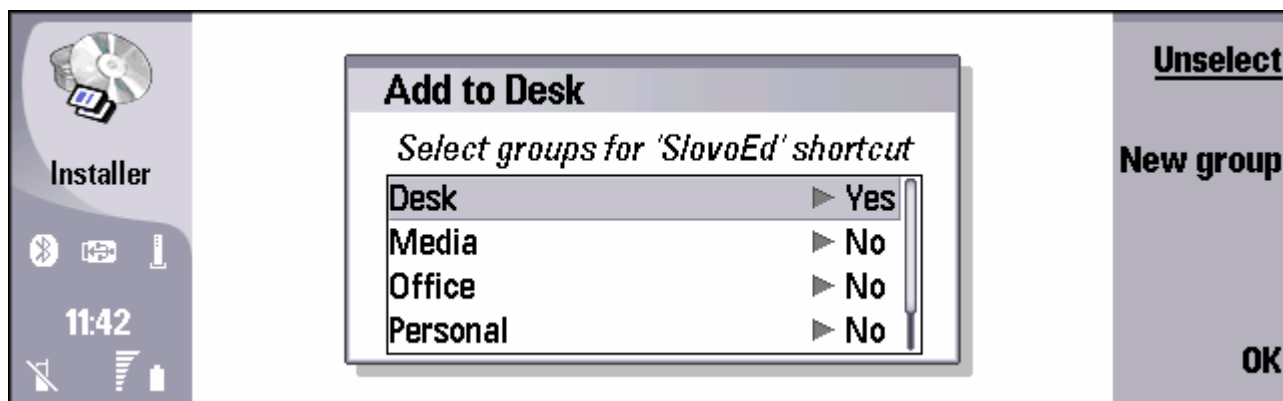

**NOTE:**

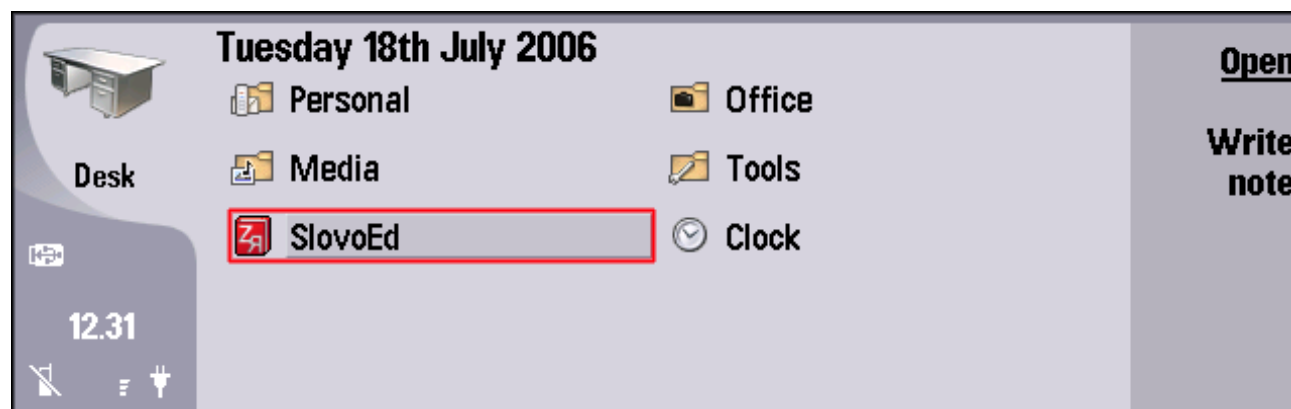

If one of the following languages (English, Russian, French, Italian, Spanish, Dutch, German or Greek) is chosen as a **Preferred language** in your communicator preferences (**Tolls>Control panel>Data manegment>Application manager tab Preferences**) this language will be chosen for SlovoEd interface during the program installation.

In this case you will not see the window with the list of available languages.

6. Choose the folder where the **SlovoEd** icon should be.

The SlovoEd icon should be in the folder chosen during the program istallation. For example, if you have chosen the **Desktop**, the **SlovoEd** icon appears in the list of applications on the **Desktop**.

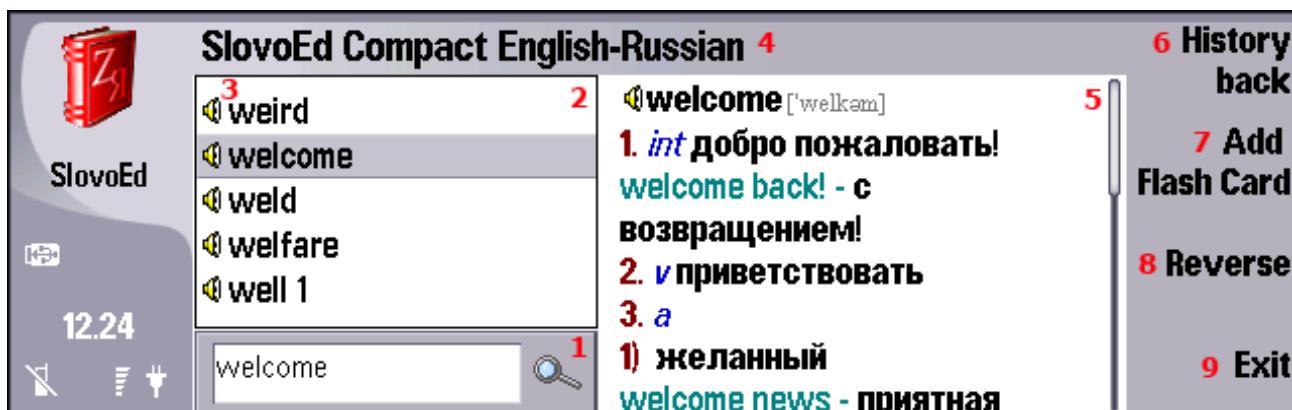

## How to use "SlovoEd"

### Interface

The main elements of the interface in the main window of the dictionary are:

1. Input line.
2. The wordlist showing the words from the dictionary database.
3. The Sound icon, showing that the pronunciation of this word is present in the Sound Module (it is shown only if the Sound Module for the language is installed).
4. The abbreviation, showing the dictionary direction in use.
5. Dictionary entry.
6. **History back** button. Use this button to come back to the entries you have seen at any time.
7. **Add Flash Card** button. Allows you to save a word to a card for studying. After you have added some new cards, you can take a **Flash Card Quiz**, which will help you learn new words. For more information about this option, see "

### How "SlovoEd" can help you to learn new words".

8. **Reverse** button. Switches to the reverse dictionary (for example, if you are reading an entry of an English-Spanish dictionary, pressing this button will switch the dictionary to the Spanish-English dictionary). The word that you have typed in the input line will remain there if its symbols belong to the alphabet of the language of the reverse dictionary. For example, if you switch from French-English to English-French dictionary the word will remain in the input line, because both French and English use Latin alphabet, but if you switch to the reverse dictionary after using English-Greek dictionary, the input line will be clear.

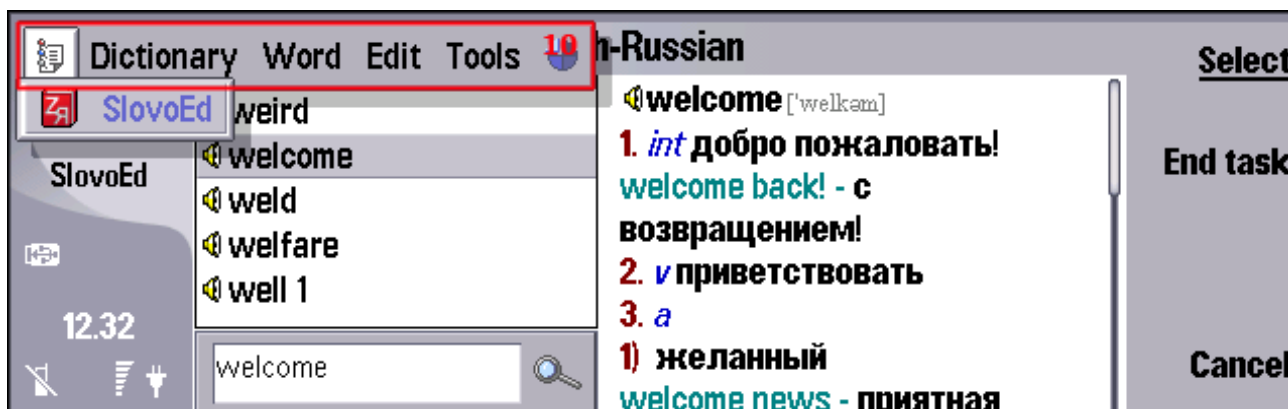

You can also switch the dictionary in one of the following ways:

- Using the menu item **Dictionary>Reverse**.
- Typing a word in the alphabet that does not belong to the current language.

#### NOTE

If you use unregistered copy of the dictionary the **Buy** button will appear instead the **Reverse** button. For more information refer to the *Ошибка! Источник ссылки не найден.*

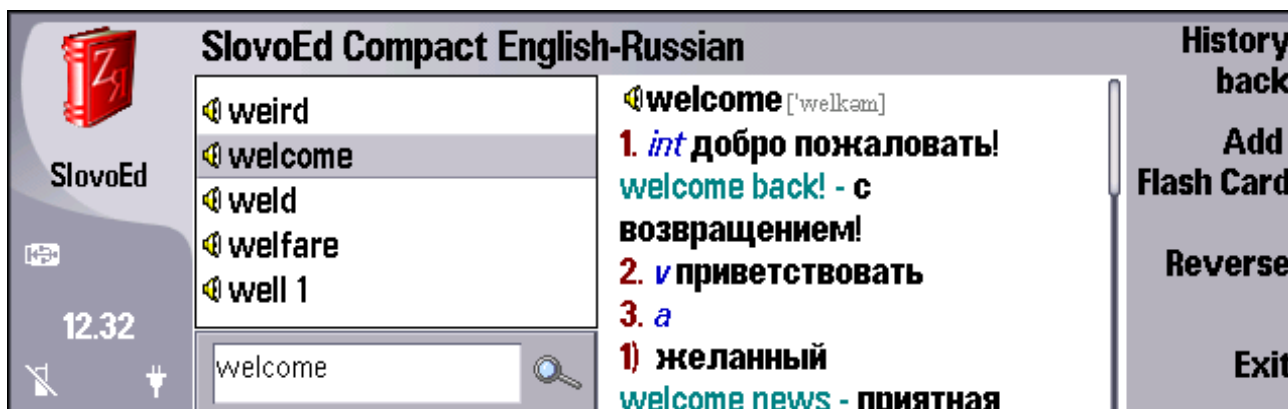

9. The **Exit** functional key.

10. The **menu** of the program. Use Menu hardware button to see the Menu of the program. For more information, see **Menu in the main window**.

### Word input

You can select words using the joystick to scroll the wordlist or type them in the input line. To see the translation of the selected word press the central part of the joystick. If the word is present in the dictionary database, you will see its translation. Otherwise, you will see the words which are closest to it in the wordlist.

You can also use the following input methods:

- Typing in a word using the keyboard of your device.

- Using **Paste** item in the **Edit** menu.

You can also lookup for the words from the translation field. Place the cursor using Tab to the word and press the central part of the joystick. You will see an entry for this word from the reverse dictionary or words closest to it in the wordlist of reverse dictionary if the word itself is not in the database.

If you are not sure about the right spelling of the word, you can use the **Wildcard Search** option (see "Wildcard Search").

## Wildcard Search

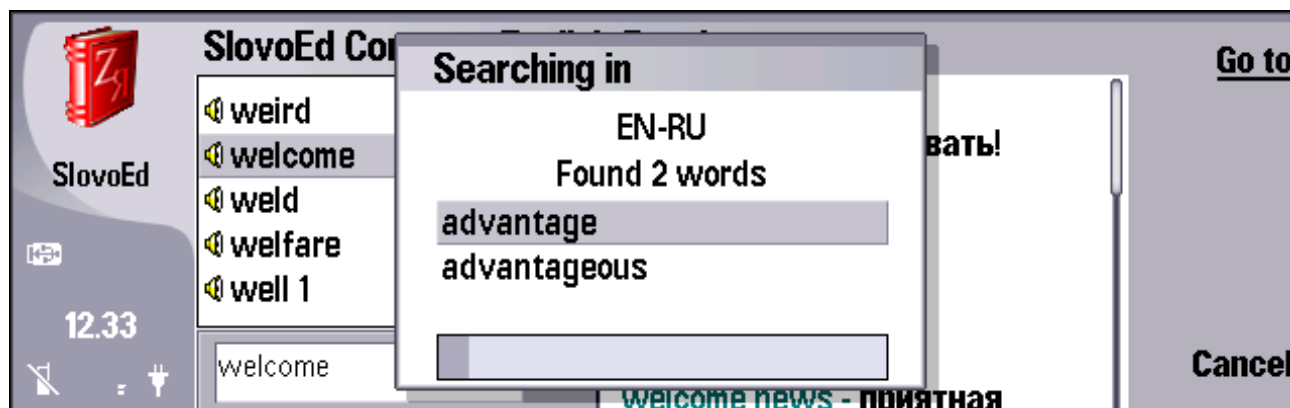

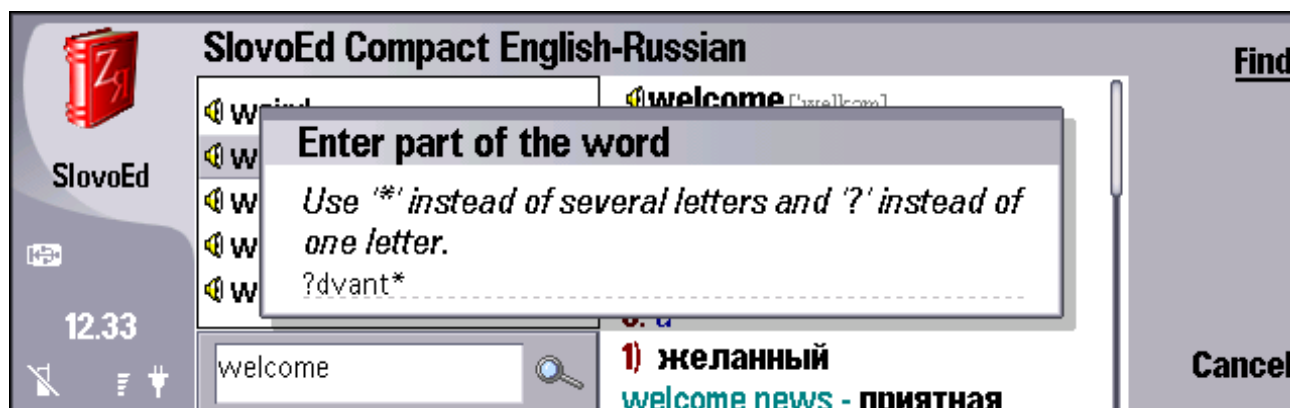

Use Wildcard search if you are not sure about how the word is spelled or if you want to find all words which fall under the same pattern (for example, while solving a crossword, you need to think of a 6-letter word beginning with un-).

Open the **Edit** menu from the main window of the program and select **Wildcard Search**.

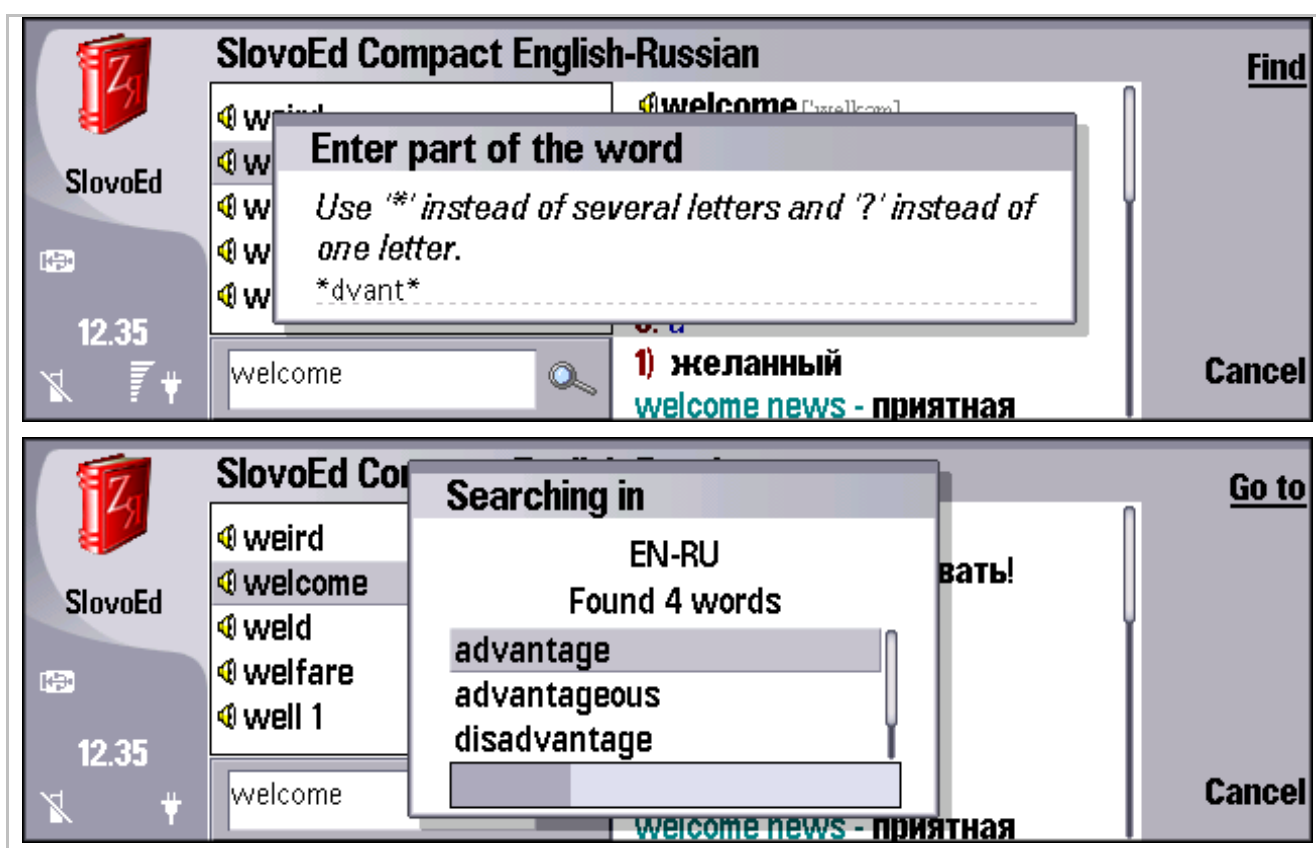

Use ? instead of one character and \* instead of a group of characters (zero or more) to form the query.

### EXAMPLE

If your query was *?dvant\**, you will see such words as *advantage* and *advantageous* in the results of the search, but the word *disadvantage* will not be shown as "disa" is more than 1 character.

If your query was *\*dvant\**, the word *disadvantage* will be included in the search results.

## Program menu

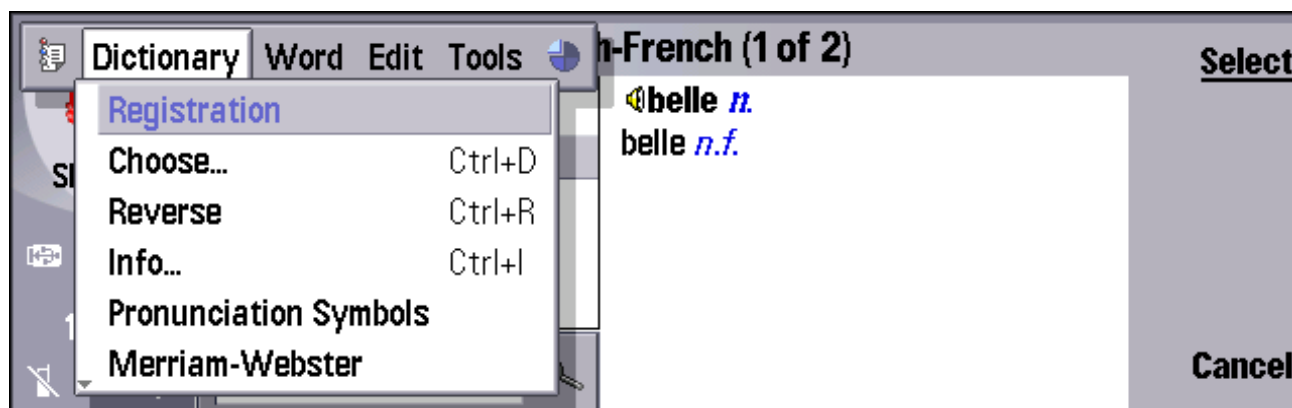

This menu gives access to several important functions and all preferences of the dictionary.

### *Menu in the main window*

The menu has 4 sections:

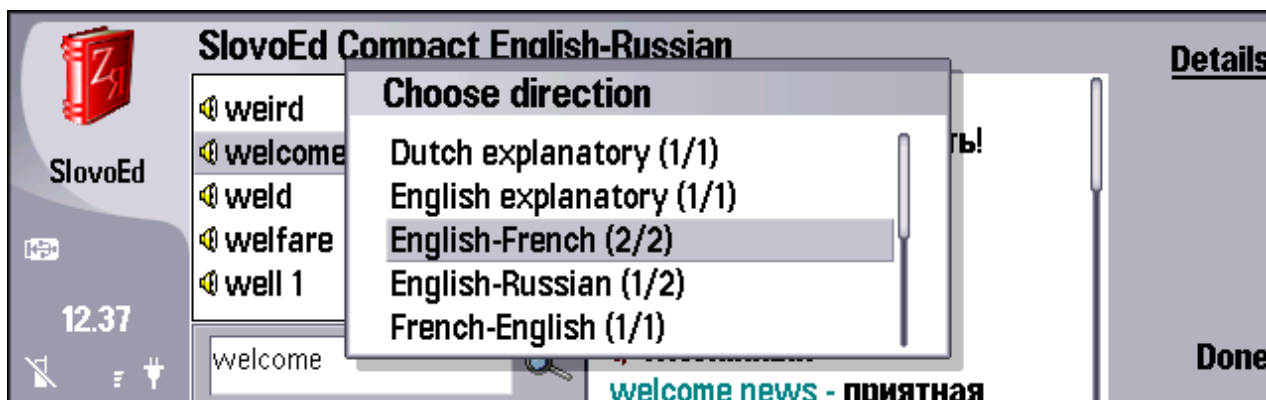

### Dictionary

When you select dictionary in the dictionary entry window, the following menu opens:

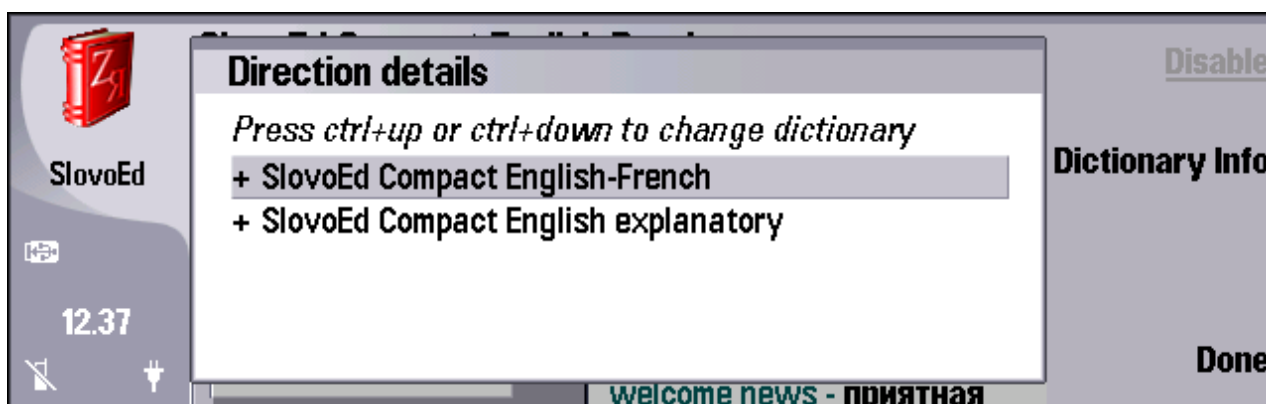

- **Registration.** Use this item to register the dictionary or Sound Module.
- **Choose.** This item allows you to change the dictionary direction also.

You will proceed to the **Choose direction** window. The first figure in the brackets near the translation direction shows the number of enabled dictionaries for the selected direction and the second shows the total number of the dictionaries installed for this direction.

Press **Details** to see the list of the dictionaries which are installed for the selected translation direction. In this window you can activate or deactivate dictionaries. For this purpose press **Enable** and **Disable**.

**NOTE**

The word translations from the disabled dictionaries will not be shown

The databases of the enabled dictionaries for one translation direction are merged. It means that when you want to look up a word the program will search this word in all enabled enabled dictionaries.

Use **Ctrl + up** and **Ctrl + down** to change the priorities of the enabled dictionaries. The priorities define the order in which the translations from the enabled dictionaries will be shown when you have several dictionaries installed for one translation direction and the translation of the word is present in more than one dictionary.

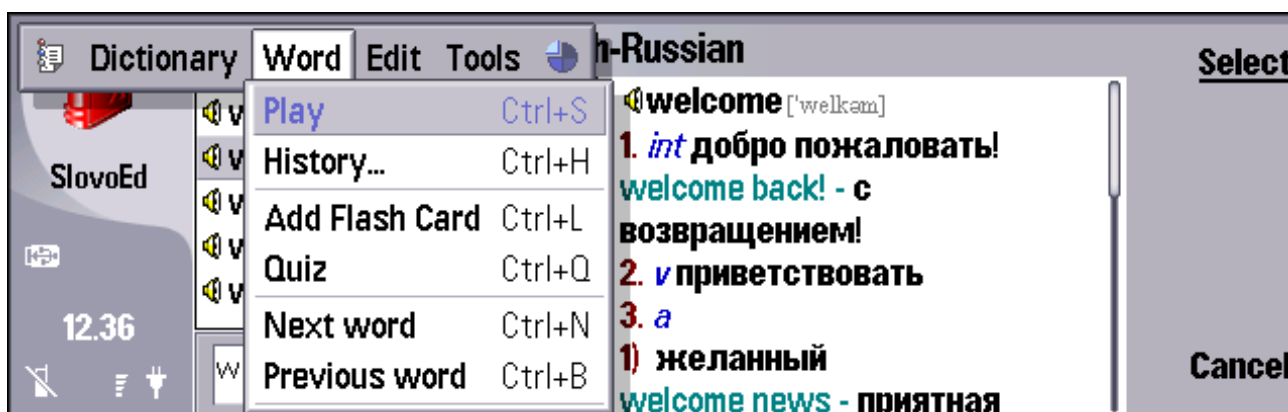

- **Reverse.** Switches to the reverse dictionary (for example, if you are reading an entry of an English-Spanish dictionary, using this command will switch the dictionary to the Spanish-English dictionary). The word that you have typed in the input line will remain there if its symbols belong to the alphabet of the language of the reverse dictionary. For example, if you switch from French-

English to English-French dictionary the word will remain in the input line, because both French and English use Latin alphabet, but if you switch to the reverse dictionary after using English-Greek dictionary, the input line will be clear. If you use one dictionary this item is inaccessible.

- **Info.** Select this item to get such information as the total number of entries in the activated dictionary databases and the Sound Module.

## Word

The word menu includes the following items:

- **Play.** Allows you to listen to the pronunciation of the word (this menu item appears only when the Sound Module is installed and contains the sound for this word)
- **History.** Your last 15 queries are saved in the history – you can come back to the entries you have seen at any time.
- **Add Flash Card.** This menu item allows you to save a word to a card for studying. After you have added some new cards, you can take a **Flash Card Quiz**, which will help you learn new words. For more information about this option, see "

How "SlovoEd" can help you to learn new words".

- **Quiz.** This menu item allows you to start the **Flash Cards Quiz**. For more information about the Flash Card Quiz, see "

---

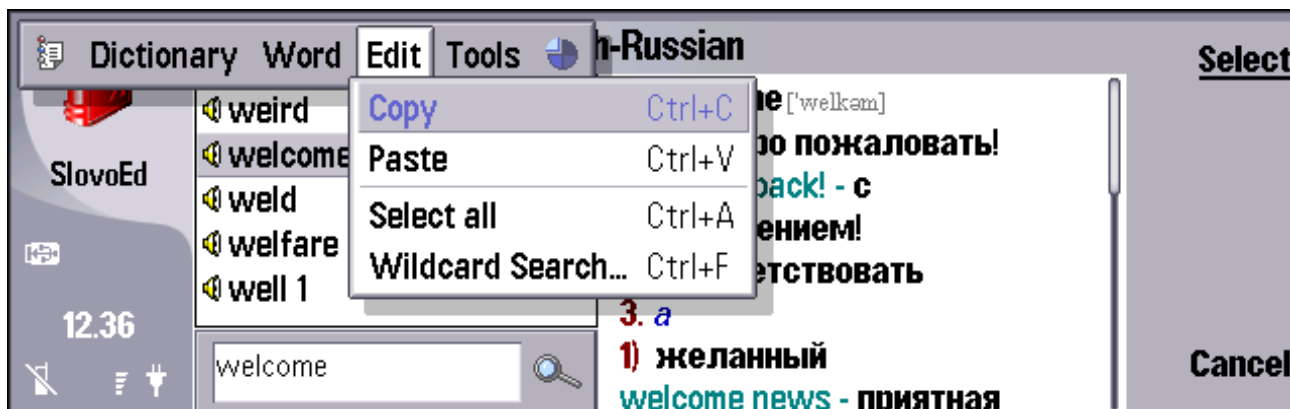

**How "SlovoEd" can help you to learn new words"**

- **Next word.** Use this menu item to see the next entry.
- **Previous word.** Use this menu item to see the previous entry.

## Edit

Using this menu section you can perform different operations with the text in the input line or the dictionary entry or change the settings of the program.

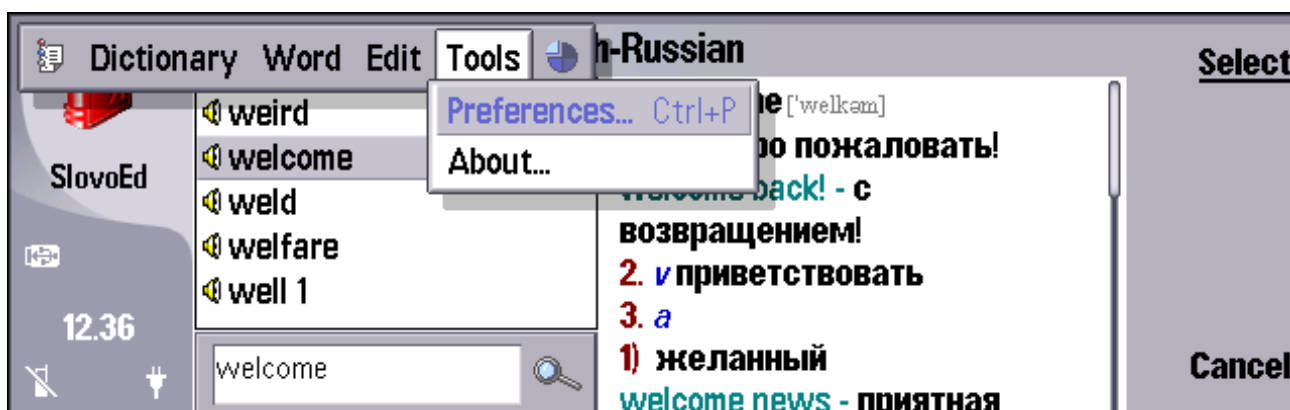

- **Copy.** Copies the selected text to the clipboard.
- **Select all.** Selects all text in the dictionary entry.
- **Paste.** Pastes the text from the clipboard into the input line.
- **Wildcard Search.** Allows you to search a word using wildcards.

For more information see **Wildcard Search**.

## Tools

This menu includes the following items:

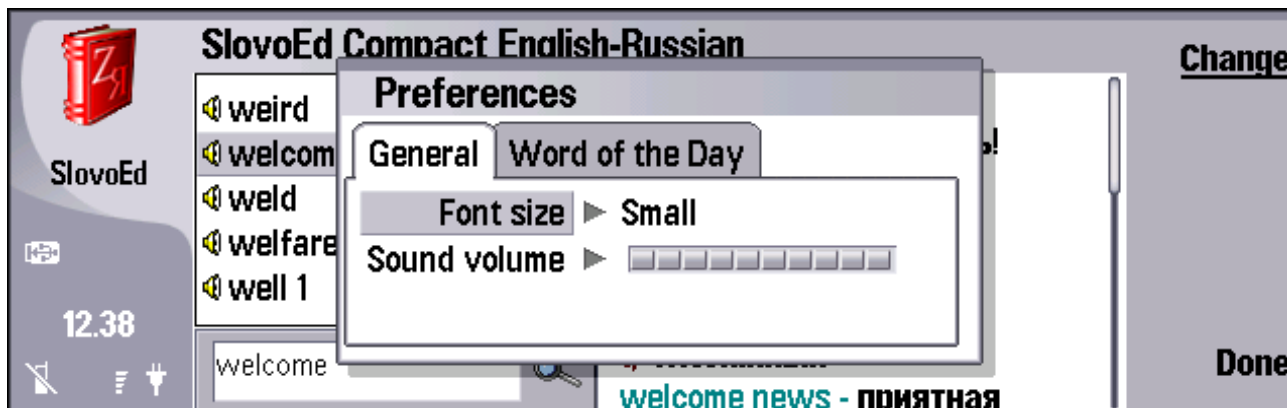

- **Preferences.** This item allows you to adjust the settings of the program according to your needs. The preferences of the dictionary are described in the "**Preferences**" section.
- **About.** This menu item contains the information on the core version of the dictionary.

## Preferences

### General

You can change the font size of the dictionary entries or choose the sound volume using **General** preferences.

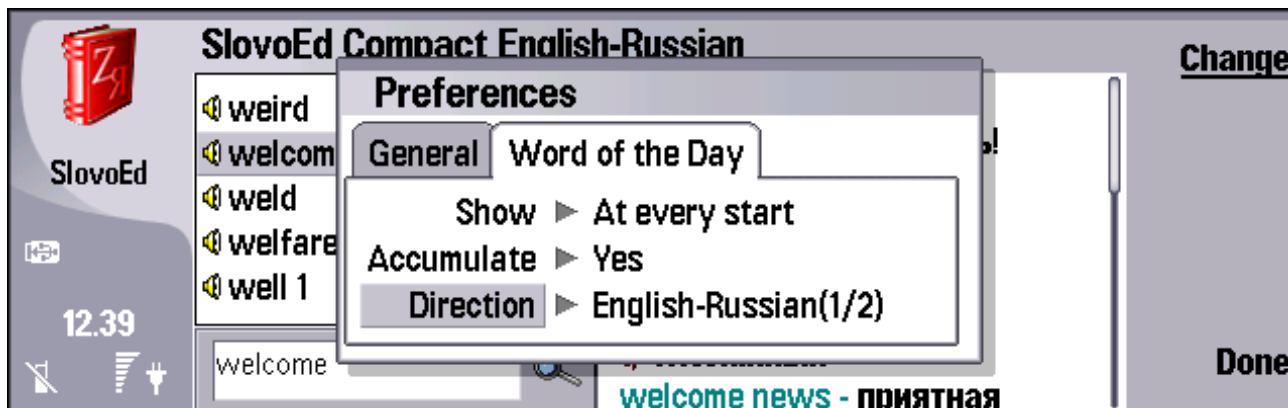

- The **Font size** option allows you to select the font of the dictionary entry (Small, Medium or Large).
- The **Sound volume** allows you to select the Sound volume for playing words.

### Word of the Day

The Word of the Day is a new word learning function introduced in the version of "SlovoEd" (see "

How "SlovoEd" can help you to learn new words").

How "SlovoEd" can help you to learn new words

This section describes the preferences of this function.

- **Show.** Allows you to set preferences for Word of the Day (You can choose Word of the Day was shown on every star or others settings)
- **Accumulate.** If you don't use the dictionary for several days, the words will be accumulated and the next time you run the program you will be able to view all of the accumulated words using next word button in the Word of the Day window.
- **Direction.** Here you can select the dictionary direction which will be used for the Word of the Day.

## How "SlovoEd" can help you to learn new words

"SlovoEd" has two functions that can help you to expand your vocabulary – **Word of the Day** and **Quiz**.

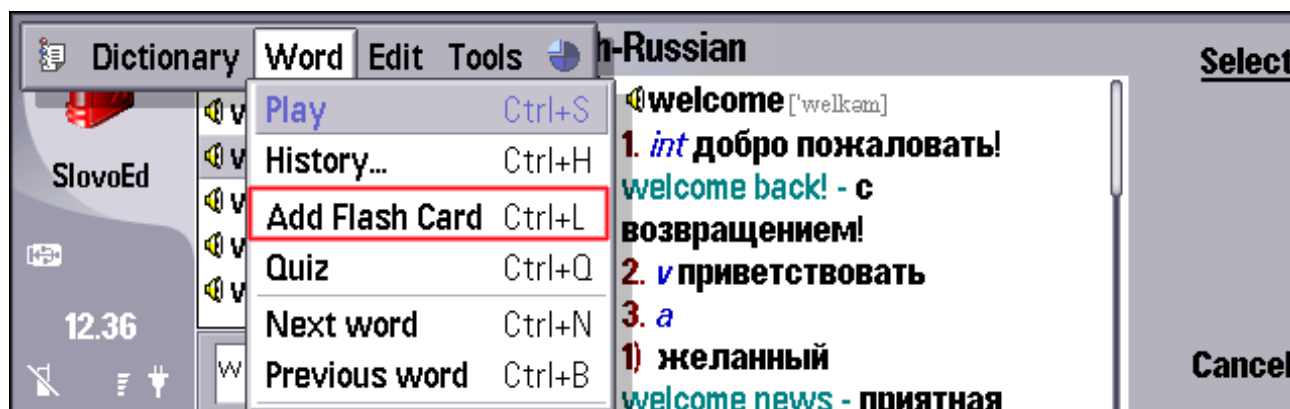

### *Adding Flash Cards and Quiz*

Epocware/Paragon Software Group developed an algorithm for a Quiz based on effective time-proved methodic of studying the foreign words with cards. The foreign word is written on the one side of the card and its translation on another. To learn the translation you take any one card from the pile and see the foreign word trying to remember its translation. Then you turn the card and see if you correctly remembered the word.

In a similar the **Quiz** in **SlovoEd** is implemented.

Unknown words found, for example, when reading the foreign literature can be added to the **Flash Cards** and later you can take the **Quiz** for these cards.

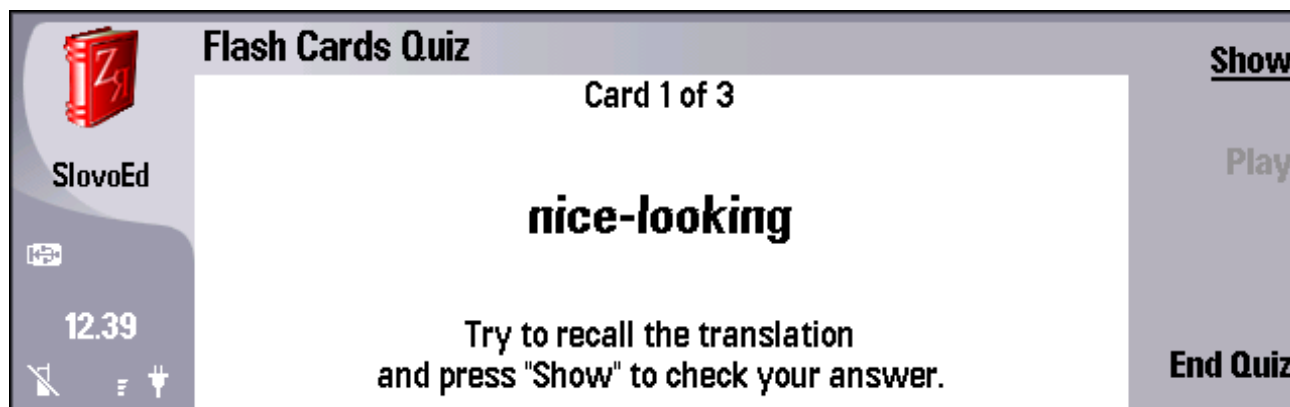

To add the necessary word to the cards open **Word** menu in the main window and choose **Add Flash Card** item.

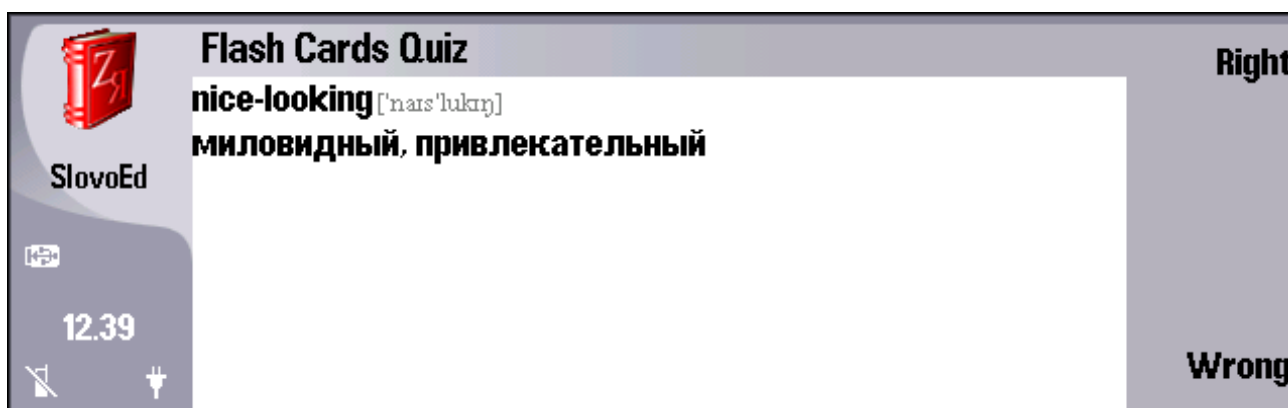

Add the words you want to remember to the cards.

After you have added some Flash Cards try to take a quiz to see if you know their translation. To start the quiz select **Quiz** the **Word** menu.

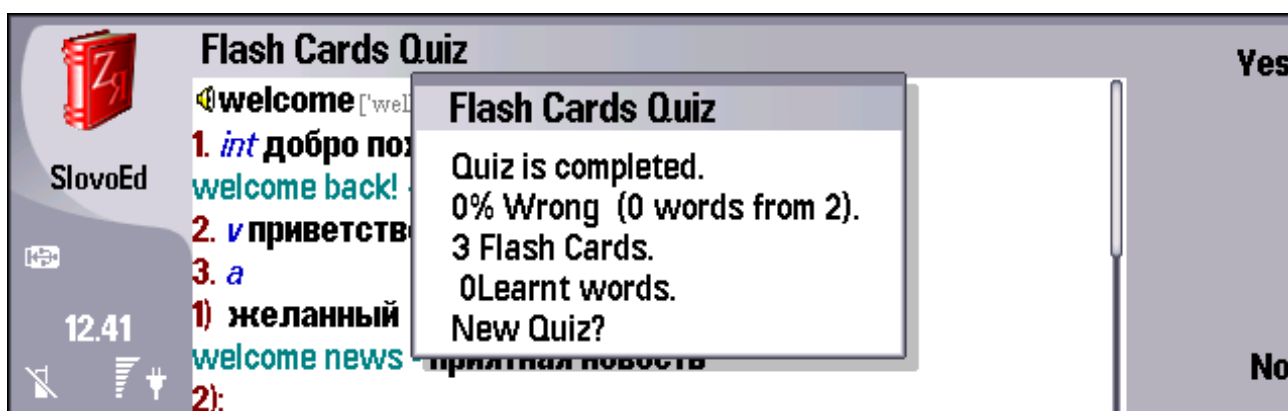

Several cards will be taken from the saved **Flash Cards** and demonstrated to you. First, you should recall the translation of the word you see on the screen. Press **Show** to see the right translation, and a window with dictionary translation of this word will appear.

There are two buttons in the translation window: **Right** and **Wrong**. If you think that the translation you recalled is correct, select **Right**, otherwise select **Wrong**.

**SlovoEd** will save the result and show the quiz statistics when the quiz is finished: the number of mistakes, the total number of cards shown and the number of learned words.

Press **Yes** to pass the quiz again, or press **No** to go back to the main window of the program.

To remember the words successfully you need to take a **Quiz** from time to time.

SlovoEd program analyzes the results of your quizzes and when you start the new Quiz SlovoEd chooses and shows the words in such order which provides the best result to remember the translation.

In a definite period the program includes the learned words in the Quiz to refresh and strengthen your knowledge.

## Quiz menu

The **Quiz** menu has the following sections:

- **Play.** Allows you to listen to the pronunciation of the word (this menu item appears only when the Sound Module is installed and contains the sound for this word).
- **Auto play.** If you select this item the pronunciation of every word that appears on the screen will be played automatically (provided that it is included in the Sound module installed on your device). If this option is switched off, you can listen to the pronunciation only using the **Play** item.
- **Show Flash Card.** Allows to see the word transcription of the card in the Quiz.
- **Delete Flash Card.** Allows you to delete the current Flash Card.
- **Delete all Flash Cards.** Allows you to delete all Flash Cards for the current dictionary direction.

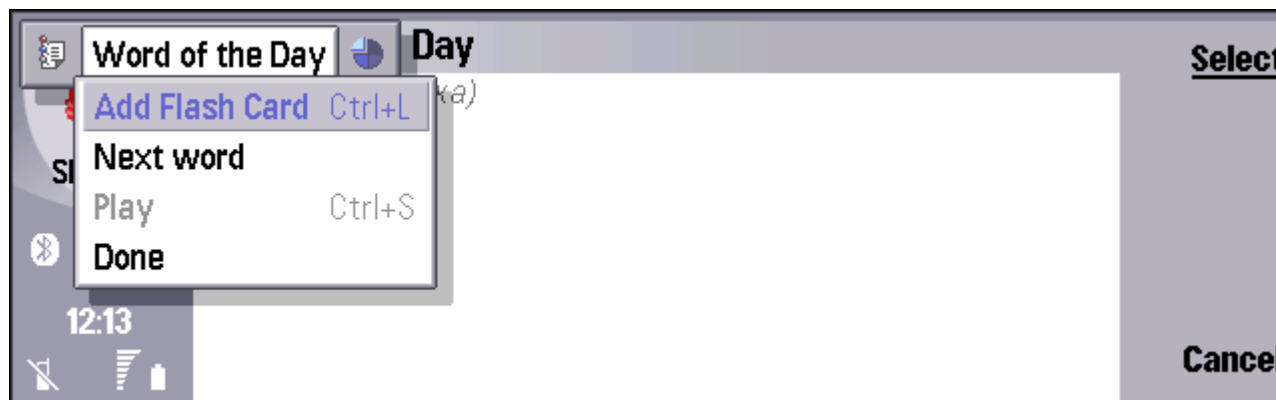

## Word of the Day

In addition to the Flash Card Quiz the SlovoEd program helps to learn the new words permanently even if you do not read the foreign literature.

Every day a word will be chosen at random order from the dictionary and shown to you when you start the program. So if you lack of time to search for new words you will improve your vocabulary permanently.

You can look through its translation and save it to a card if you want to learn it.

The Word of the Day menu has section **Word of the Day**:

- **Add Flash Card.** Adds current word to a Flash Card for studying.
- **Next word.** Allows you to see the next Word of the Day if you didn't open the dictionary for some days.
- **Play.** Allows you to listen to the pronunciation of the word (this menu item appears only when the Sound Module is installed and contains the sound for this word).
- **Done.** Pass the Word of the Day.

## How to create your own dictionary

If you use the specific terms and for more effective work you need a special dictionary which includes these terms you can create it by yourself.

The "SlovoEd" application for any mobile platform consists of 2 parts: the dictionary engine and the dictionary databases. Paragon Software (SHDD) has developed "SlovoEd Studio" – a special toolkit for creating \*.prc databases. We offer this toolkit to all users who are interested in creating their own dictionaries. You can download the free copy of "SlovoEd" Studio at [http://palm-software.penreader.com/SlovoEd\\_Studio.html](http://palm-software.penreader.com/SlovoEd_Studio.html)

**SlovoEd Studio & Conversion Tools** is a freeware program for advanced users. It allows you to convert dictionary databases of different formats to the .prc format supported by the "SlovoEd" dictionary engine. With "SlovoEd" Studio & Conversion Tools you can create dictionary databases out of the source file you have chosen and set the layout that you prefer.

**SlovoEd Studio & Conversion Tools** program is installed on the desktop computer. The process is very easy and fast. The compiler allows you to convert the resource database (\*.dsl, \*.wb, \*.csv) into the \*.prc format, which can be used with "SlovoEd" dictionaries.

"SlovoEd Studio" not only helps you to compile a dictionary database, but also helps you to convert any dictionary-like data to a handy format.

For example, you can organize a contact list or a kind of corporate database which contains information on the products of your company.

This utility is more convenient than the standard instruments (such as Pocket Excel or a built-in Address book), because it allows to markup all the entries quickly according to the logical structure of the entries, and

because the \*.prc database which you get at the output is compatible with all mobile platforms. Another advantage of a \*.prc database is that it is significantly more compact than an ordinary database, and the "SlovoEd" engine guarantees the fast search even if the \*.prc file contains many thousand entries.

**ATTENTION!**

*There is a technical constraint: the filename of the user dictionary cannot start with symbol "1".*

To install your \*.prc database on your device, you should copy it to your device. If "SlovoEd" is installed in the main memory of the device, copy the file to **Office\File manager\Communicator\System\Apps\SlovoEdDicts**. If "SlovoEd" is installed a storage card, copy the files to **Office\File manager\Storage card\SlovoEdDicts**. If the "SlovoEd" application was open when you were copying the files, close it and then open it again to see the new dictionaries in the list of available dictionaries.

## Hotkeys for quick manipulation with the dictionary

There are some hotkeys to act quickly in the dictionary:

<b>Tab</b>	Change the active window
<b>Ctrl + H</b>	Open history
<b>Ctrl + D</b>	Choose dictionary
<b>Ctrl + R</b>	Reverse dictionary
<b>Ctrl + I</b>	Open "About" dialog
<b>Ctrl + C</b>	Copy text into Clipboard
<b>Ctrl + A</b>	Select all text
<b>Ctrl + P</b>	Open preferences
<b>Ctrl + F</b>	Set search after former
<b>Ctrl + E</b>	Close "SlovoEd"
<b>Enter</b>	Translate word
<b>Chr+?</b>	Opens the help file.
<b>Ctrl+S</b>	Play
<b>Ctrl+L</b>	Add Flash Card
<b>Ctrl+Q</b>	Quiz
<b>Ctrl+N</b>	Next word
<b>Ctrl+B</b>	Previous word
<b>Ctrl+V</b>	Paste
<b>Ctrl+A</b>	Select all

## Uninstallation

To uninstall the dictionary, do the following:

1. Open **Tools->Control Panel->Data management->Application manager**.
2. Press **Remove**.
3. One by one delete the Databases files (select a file in the application list and press **Remove**). The names of the Databases files.

The dictionary engine and the sound modules should be uninstalled separately.

## Useful information

### How to get the registration code

We invite you to our web-site <http://www.epocware.com/>, devoted to dictionaries and other applications for communicators developed by Epocware/Paragon Software Group. There you can find demo-versions and detailed information about more than 150 different dictionaries available for 30 languages.

Visit our site: <http://www.epocware.com>, and select the dictionary you want to purchase; after this you can get the registration code using secure on-line ordering with your credit card via the e-Shop. Do not worry, we never get your credit card information, ordering is proceeded through specialized American and European e-commerce systems.

This way of payment provides the "real-time fulfillment", that means that your registration code will be emailed to you immediately.

Also you can order the registration code directly from your device. For this purpose use "**Buy**" button in the Registration window or open the mobile site: [pda.penreader.com](http://pda.penreader.com) using Internet Explorer on your device.

### E-care

We recommend that you register in our **E-Care** system which helps to automatically register and update your programs. To register the program you need the registration code for your software.

**E-Care** allows you to:

- get free updates on the releases of new versions;
- register your copy at any time you want – so you won't have to worry if you accidentally delete the program;
- download current versions of the registered programs;
- get in touch with our support team - your request will be processed with the highest priority;
- learn more about our products (get the demo-versions and learn how to purchase the product);
- get the notifications about releases of the new version of the program.

The details of the registration procedure and the E-Care system you can find at: [http://www.penreader.com/company/e\\_care.html](http://www.penreader.com/company/e_care.html).

### Knowledge Base

Support knowledge Base is available for our customers! You can find there detailed answers to all frequently asked questions about the most popular programs of Epocware/Paragon Software Group, including "SlovoEd" [multilingual dictionaries](#) for Symbian communicators, [One for all Solitaires collection](#), [Handy Tools utilities](#), and others...

Visit our Support Knowledge Base before writing to our support team or while you are waiting for a reply from the customer support service. We suppose you will find there the necessary information on your problem.

Welcome to Support Knowledge Base!

<http://support.epocware.com>

## *Appendix:* Sound module. Installation and usage

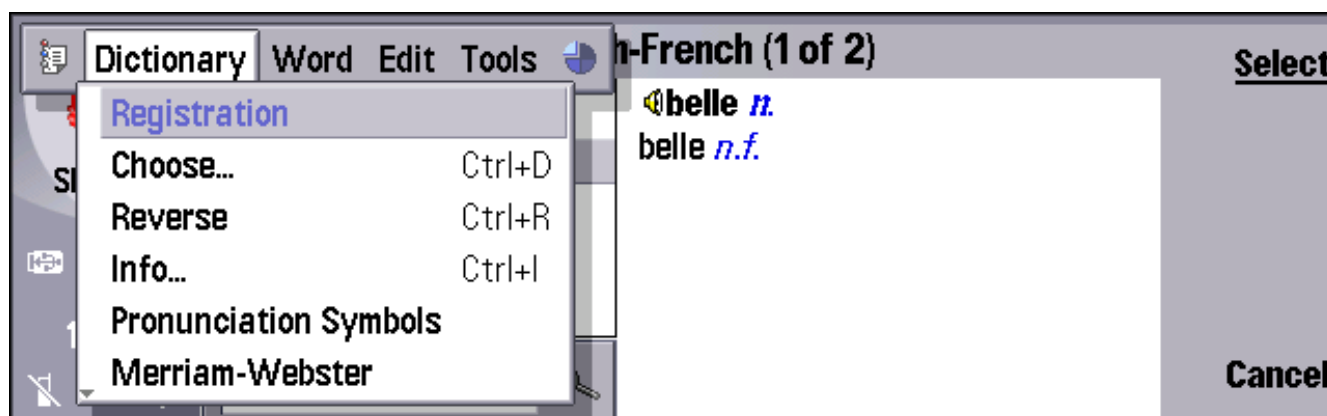

Many dictionary databases used with "SlovoEd" dictionary engine have always provided phonetic transcription for the words. Now you can look at the translation and the transcription of a word, but also you can listen to it and improve your pronunciation (the words are spoken by professional native speakers).

With a dictionary you can use a Sound module, which contains the pronunciation of the words from the dictionary wordlist. Sound modules available for a specific language vary from maximally full versions to compact versions that contain only pronunciation of the most frequently used words.

For the information about "SlovoEd" dictionaries for communicators and available sound modules, please visit our site: <http://www.epocware.com/>.

### Sound Module. Trial-version limitations and registration.

The more you use an unregistered sound module, the more often you hear a beep instead of the pronunciation. To be able to register the Sound Module you should purchase the registration code. To register the Sound Module select **Dictionary > Registration**

If you have already purchased the product press **Register** and enter the registration code for desired dictionary or Sound Module which was sent you after purchasing

#### NOTE

*Each installed dictionary should be registered with its own registration code*

*Please be accurate when you type in the registration code: do not mix up zero with letter O, you should not enter any unnecessary spaces in the input line.*

If you use the trial-version of the dictionary and decide to buy it you can make your order immediately from your device without exiting the **SlovoEd** program. For this purpose press Buy button in the **main** or **Registration** window.

### Sound module. Installation

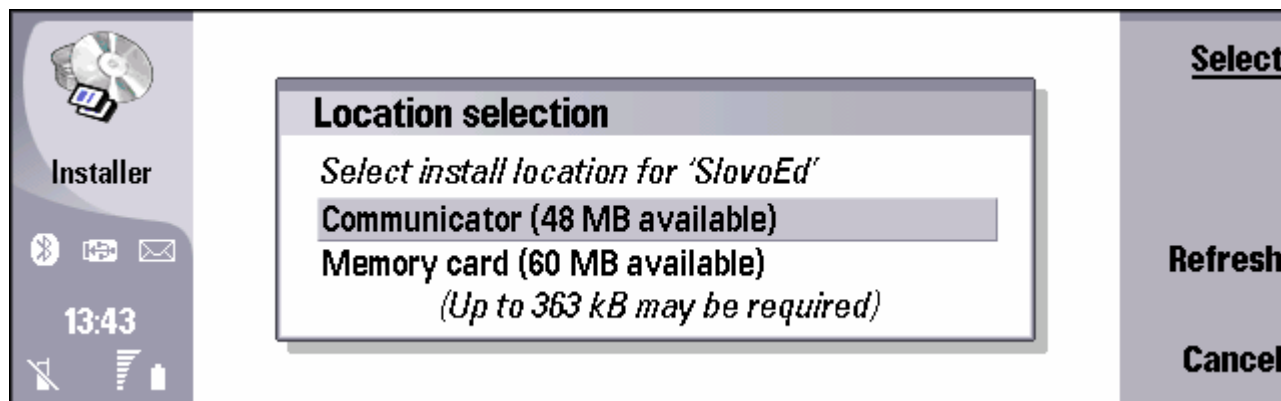

You can install the Sound Module using \*.sis files (from the desktop computer or directly from the device).

Installation from the \*.sis file requires that in the main memory of your device there is 3 times as much free space as the volume of the file (no matter what is the source media).

## Installation from the desktop computer

To install the Sound Module, you should do the following:

1. Establish the connection between your NOKIA 9300/9500 Communicator and the desktop computer, using Bluetooth, Infrared port or a cable.
2. Run the installation \*.sis files one after another– and follow the instructions of the installation program.
3. A dialog where you can select the destination media will appear. Select **Communicator** if you want the dictionary to be installed into the main memory, or **Storage card** if you want the application to be installed on an expansion card.

## Installation from the device

We offer you a set of installation \*.sis files. To install the Sound Module you need install all \*.sis files of this set one by another.

1. Copy the installation (\*.sis) file to your device (using Bluetooth, Infrared or by some other method). Depending on a model of the device, you may need to run a special application to make the copying of the files possible.
2. Open the menu **Messages**.
3. Select the Sound Module file in the list and press **Open** to run the installation.
4. A dialog where you can select the destination media will appear. Select **Communicator** if you want the dictionary to be installed into the main memory, or **Storage card** if you want the application to be installed on an expansion card.

## Sound module. How to use it

After you install the sound module, in the wordlist a Sound icon  will appear near some words if their pronunciation is present in the sound module (it will be shown in the wordlist, in the title of the dictionary entry and in the Flash Card Quiz). Also you can use the **Play** menu item or press **Ctrl+S**.

## Sound Module. Uninstallation.

1. Open **Tools->Control Panel->Data management->Application manager**.
2. Press **Remove**.

Select a file in the application list and choose **Remove**). The names of the Sound Module files.

The dictionary engine and the Sound Modules should be uninstalled separately.

*Dear customers!*  
*Your reports and comments are highly appreciated.*  
*They help us to improve our programs quality.*  
*Thank you in advance for your reports.*
